

## **Board of Directors Spotlight Questions**

1. What made you want to join the board at TRC? –

I started spending time in Nashville when I met my husband because he went to school here, so we always came back and visited his old college friends. I fell in love with the city back then, and as OneSource started to grow in Tennessee, I knew I wanted to be a part of the regional council that supported the area. The people of TRC have been an amazing network of smart, compassionate and committed business associates who have become really good friends. To join the Board and serve our industry is really an honor. It's good for business, but it's also good for my life and my spirit.

2. How did you get into the Relocation Industry?

I got sprinkled with relocation fairy dust and dropped down into it.

3. What are some fun facts people may not know about you?

I love the song "Wagon Wheel," food so spicy it makes you sweat, funny people who make me laugh, black clothes (okay, people know that), and I am the only child of a strong, single mother. I hate cold days, the sound of a pen clicking in a meeting, when people block intersections and inauthenticity.

4. Who has been an influential person in your life and why?

Our COO at OneSource, Michael Nimer, has been both personally and professionally profoundly influential. He is the voice of reason when things can be confusing; he is the sounding board of experience for my grandiose ideas; he's an unwavering champion of everything we try to do; he's my best road trip partner. He's the mentor everyone should have at some point in their career.

5. What was your favorite vacation and why?

I love all vacations! I am excellent at vacations! I should have a performance evaluation on my ability to vacation.

6. What's your favorite meal?

Dinner. Oh, you mean a food? Hmmmm... If we want to talk Nashville in honor of TRC coming up, Hattie B's hot chicken, the tater tots at Merchant's and anything at Chauhan Ale and Masala House!

7. Tell us about your family.

Well, I have a great family... I probably talk about them too much, but I have a terrific husband and three pretty amazing kids: a boy, 14 and two girls, 11 and 8. We have a dog, a chameleon, a gecko, two guinea pigs, a hamster, a gerbil and two fish. My theory is the kids are only little once, so I say yes on this whole pet thing more frequently than I would like, but whatever, it's fine (eye roll). So far with the kids, I have an actor who wants to be a lawyer, a scientist who wants to be a YouTube-er and an artist who wants to be a baker. They really are just so much fun.
